THE MONEY MARKET.

Latest Reports from Leading Business Centres.

The census bureau has issued a bulletin classifying the population of the United States in 1880 by nativity. The native born were: Whites, 36.843,291; colored, 6,632,549; foreign-181,729 of Sweden, 106,971 of France, 104,541 | figures to property owners or underwriters. of China, and the remainder represent all the countries of the earth. The bulletin shows that while in 1880 the total population persons in the United States who were born in lation 1,542,359; total number of Tennesseeans ous at about 10,000,000 per year. in the country, 1,787,504. Ohio, population 3,198,062; Ohioans in the country, 3,302,656. gia, population 1,542,180; Georgians in the country, 1,719,068. Alabama, population 1,-262,505; Alabamians in the country, 1,319,189. South Carolina, population 995,577; South Carolinians in the country, 1,183,311. Vermont, population 332,286; Vermonters in the country, 430,041. Maryland, population 934,-943; Marylanders in the country, 958,141. Maine, population 648,936; natives of Maine in the country, 745,272. Delaware, population 146,608; Delawareans in the country, 155,517. In all the other States and Territories the population is greater than the total number of natives of the respective States in the whole

Norvin Green, president of the Western Union Telegraph Company, has just tendered his resignation to take effect October 11th. This is thought a move to make way for Gould, who is the heaviest stockholder. Dr. Green's report | by Consul Sterne, of Budapesth, that contrary will show that, compared to the last annual re- to general expectation the price of wheat, inport of his predecessor for the year ending stead of Reing well sustained at 120 cents per June 30, 1877, the gross receipts of over \$17,- bushel, has within the two weeks ended Aug. 100,000, and net profits of over \$7,100,000, as 25, 1882, fallen to 115 cents, and even at this against gross receipts of \$9,800,000 and net decline the export, which had opened under profits of \$3,100,000-an increase in five years flying colors, is dragging, and there is every of 80 per cent, in the gross revenues, and of probability of a still further reduction. This over 130 per cent. in the net profits, while the change is principally caused by the reports rate of expenditures has been reduced from 69 per cent. to 58 per cent. of the gross revenues. In the past five years the mileage of lines has been increased from 79,955 to 131,032, and of tion of grain from the interior, and the general wires from 194,233 to 374,294 miles; the number of offices from 7,500 to 12,050, and the number of messages from 21,158,941 to 39,000,000 not including messages sent over wires leased to the press and to brokers, and a very large number of messages sent for railway companies, of which no account is taken, showing an increase of over 90 per cent. in the plant, 60 per cent, in the number of offices, and (including the growing railroad service) of more than 100 per cent. in the amount of work done over the

Oil City, Pa., reports inform us of the failure of the gushing wells in Warren county. The great 646 came in with a deluge of oil, and harm, the crop being so forward as not to be so great was the greasy flood that tankage could affected. not be erected fast enough to contain it. The Pipe Lines, with their immense pumps, could not keep pace with the flow of the wells. The hills and streams were covered with the waste from the overflowing tanks. There came a magical change. For some unknown cause the largest of the Cherry Grove wells, with others, ceased to flow, and no exertion could induce them to respond. Under this change the oil market rebounded from the forties to the sixties. The excitement upon the Oil Exchange over the frolicking wells is intense. The sudden decline threatened the trade witth wholesale bankruptcy, when a rebound followed the rapid exhaustion, and now the yield seems as productive as ever. Conservative operators pause to inquire whether or not the expansion is not as unnatural as the contraction.

The Bureau of Statistics furnishes information showing that the total number of emigrants that arrived in the United States during the two months ending August 31, 1882, as compared with the two months ending August 31, 1881, were as follows:

weg entranced	1882.	1881
England and Wales Ireland	9,281 2,323 1,938 32,731 1,794 5,518 8,489 11,723	15,71 10,72 2,91 3,58 39,80 1,31 5,73 9,98 10,64 12,90
Total	108 086	113.33

A statement has been prepared by the Treasury Department which shows that from Nov. 1, 1881, to Sept. 1, 1882, under the administration of Secretary Folger, the interest-bearing debt of the United States has been reduced by \$129,635,000, and the annual interest charge by \$4,515,756. During the eight months of Secretary Windom's administration the reduction of the interest-bearing debt was \$108,296,250, and of the annual interest charge \$15,883,692. This large reduction in the interest charge was affected by refunding the fives and sixes into 31 per cent. bonds. During Secretary Sherman's four years' term the reduction of the debt was \$205,824,730, and of the interest charge, \$17,557,708. The total reduction since August 31, 1865, when the debt reached its highest point, has been \$943,936,544, or 40 per cent. of the whole. The whole debt is now

\$1,658,926,171. The total real estate tax and personal tax of New York for 1882 was \$1,233,476,398.33, an increase of \$47,528,299.37 as compared with the valuation of 1881. The rate of tax upon the aggregate valuations of real and personal estates in the city of New York amounting to \$1,203,-929,324.33, with the rate of \$2.25 per centum, together with the rate of \$2.0152 upon the aggregate assessed valuations of personal estates of such corporations, joint stock companies, or associations as are subject to local taxation, amount to \$29,547,074, and will produce the sum of \$27,681,427,26. The rate of tax levy last year was at the rate of \$2.62, as against \$2.25 this year.

The town of Farge, Dakota, in 1880, had less than 2,000 population, while to-day it boasts of 8,000. This great change is due to the enterprise of its citizens, who are a pushing, energetic people. Itstead of the usual country stor a generally seen in places of such a small population, huge brick blocks are found and every inch of room is occupied. From fifty to one handred new buildings are now being

During the session of the Tariff Commission in Minneapolis, Minn., on the 14th inst., the Secretary of the Board of Trade stated that the city owed its prosperity originally to lumber and flour mills. The shipments of flour in 1860 were 30,000 barrels, and in 1881 3,142,974 barrels. The quantity of wheat ground into flour in 1881 was 16,500,000 bushels, being 2,500,000 bushels more than the entire receipts at Chicago in that year. The foreign export of flour from that city in 1878 was 109,183 barrels, and in 1881 amounted to 1,181,324.

The District Amalgamated Association convention at Youngstown, Ohio, Tuesday voted, by an overwhelming majority, to return to work at the old rate. Similar conventions were held at Pittsburg and Wheeling, at which it was decided to withdraw all the demands made on June 1, and to present the old scale of wages to the manufacturers for their signatures. This virtually ends the strike of the iron-workers, which has lasted 116 days. The loss to laborers in wages is estimated at between \$8,000,000 and \$10,000,000.

The losses by fire for the first eight months born, 6,679,913; total population, 50,155,783. of 1882 foot up more than \$61,000,000, more Of the foreign-born 2,772,169 were natives of than \$5,000,000 in excess of the total for the the United Kingdom of Great Britain and same months of last year. The July record of Ireland, 1,966,742 of the German Empire, losses was higher this year than ever before 717,084 of British America, 194,337 of Norway, except in 1866. These are not encouraging

Statistics of sale and settlement of United States public land show a rapid and gratifying growth of the agricultural interest. For the of Virginia was 1,512,565, the total number of fiscal year lately closed the average number of acres disposed of is put at upwards of 15,000,000. Virginia was 2,118,460. Tennessee, total popu- and for two or three years immediately previ-

A stupendous project is on foot in New York to establish a system of telephonic communication between America and Europe, and which is at present occupying the attention of renowned electricians and capitalists on both

The sales at Oil City (Pa.) exchange from Monday morning till the close of exchange on Saturday afternoon last were 41,976,000 barrels. This is the largest week's business in the history of any oil exchange.

Rumor says the Gas Company at Dayton, O., recently increased its capital stock \$50,000, and bought up the Electric Light Company with it, thus controlling the field.

THE CROPS.

The Department of State has been notified from the United States of abundant crops and immense shipments of grain. Another reason is the difficulty attendant on the transportainability of the railways to supply adequate

Special dispatches received at Chicago, this week, report that the corn crop in every direction has been wonderfully improved by the past two weeks of fine weather. In southern Illinois it is believed the crop will be safe from frost by the first of next week. The crop will be a full three-quarters average. In Iowa, it is thought, the yield will be the largest and best ever known in the State. The corn had hardened and is fast getting away from danger by frost. The hot weather which still holds in Nebraska and parts of Kansas has done no

Illinois has raised this year the extraordinary crop of 100,000,000 bushels of oats. This crop is a third larger than the largest of any previous year, and it no doubt surpasses the entire crop of that kind in the entire country not many years back. The oat crop everywhere is a prodigious one this year, and the value of it is manifest; it has a direct bearing on the values of live stock, and that interest again enters into many important elements of wealth. And while raising this phenomenal crop Illinois has done almost as well in all the other products of her fields.

The directors of the Northern Pacific R. R. Co., at their last meeting in New York, authorized the issuance of a new obligation amounting in value to eleven and one-tenth per cent. of preferred stock to be issued to preferred stockholders only. This is to meet the claim that the company, since its organization in 1875, has earned a surplus of \$4,530,000, which should have been paid as dividends on preferred stock, but which has, instead, been used in | coal mine owned by the Denver and Rio extending and maintaining the road.

Enicurians may be interested in reading that in Mr. Olsen's paper on the "North Sea Fisheries," he writes of 200 miles of oyster-beds, 30 to 70 miles wide. That is 10,000 acres of splendid oysters near the British coast. A curious feature is that the oysters lie at a depth of 21 fathoms, which rebuts the idea that oysters can only be raised in shallow water. Oysters will hardly be cheaper in consequence, but what shall we say of a man who discovers 10,000 acres of oysters?

The Department of State has received a dispatch, dated August 28, from Minister Cramer. of Berne, in regard to the almost total failure of the potato crop in Switzerland, potatoes Railroad by a barbecue last Saturday. forming one of the principal articles of diet of the Swiss. Mr. Cramer assumes that a large import must necessarily take place, and he suggests that American exporters of breadstuffs should at once make arrangements to supply

the deficit. The western wheat crop harvests have been completed under favorable conditions and corn has steadily improved. The wheat crop of 1882 in the United States will exceed 500,-000,000 bushels. Winter wheat in large quantities is now being sown, and indications are that there will be a decided increase in next

Articles of association for the Arkansas and Indian Territory R. R. was filed at Little Rock, Arkansas, on the 14th inst. The capital is \$1,000,000. The road is to begin in Sevier or Polk county and run southeast to Washington, in Hempstead county.

The cotton movment for the twelve months ending with Augest was considerably less than for either of the two preceding seasons. The yield was 5,435,845 bales in 1881-2, 6,589,329 in 1880-81 and 5,757,397 in 1879-80.

near Bismarck, weighs sixty-four pounds to the bushel measure. During the present season 5,670 car loads of

peaches were shipped by one road from Dela-

RAILROAD NOTES.

The Pennsylvania Railroad Company has transmitted to the mayor of Jersey City a check for \$30,000 as a voluntary contribution towards defraying the expenses of the municipal government. It seems that under the laws of New Jersey the Pennsylvania Company pays all its taxes to the State, and is under no legal obligation to pay anything to the towns and cities through which the road passes. In contransmitted to the mayor of Jersey City a erected, also factories, car shops, mills, etc. pal government. It seems that under the laws Good botels are also here, of which some of New Jersey the Pennsylvania Company pays larger places would be proud, and the electric all its taxes to the State, and is under no legal · light shines for all over this peaceful little obligation to pay anything to the towns and

In 1871, Mr. H. R. Robbins invented the now famous Robbins' Family Washer and Bleacher.

It is the best and only perfect self-operating Washer in the world. It will do all the family washing in less than half the time in which it can be done in any other way without labor, with but little soap, without chemicals and without wear and tear or yellowing of clothes. More than fifty thousand of these Washers are now in More than fifty thousand of these Wasners are now in use, giving perfect satisfaction. We have thousands of testimonials from all parts of the country—from Public Institutions, Hotels, Clergymen, Lawyers, Farmers, Edit-ors, and every class of people, and the Editorial Com-mendations of all the principal papers in the land. In 1878 The Bissell Manufacturing Company purchased the patent, and after two years' experimenting succeeded in simplifying the Washer, and in adapting it to use in any size and style of boiler, as also in the old-fashioned iron wash-pot so much used in the South.

THE PRINCIPLE OF THE WASHER. The operation of the Washer consists in rapidly and continuously forcing the hot soap-suds contained in the boiler from the bottom to the surface, through a tube and then drawing it down again through the soiled clothing, while that is expanded by the boiling heat—causing it to remove every particle of dirt and leaving the articles after rinsing thoroughly cleansed and bleached. It is impossible for it to tear or wear, or in any way injure the fabric, as there is no friction whatever. HOW DOES THE WASHER WORK?

The Washer having been placed in the bottom of the boiler or pot, as soon as the water commences to boil, all which is beneath the washer, being surrounded with heated metal, becomes hotter than that in the remainder of the boiler, and thus has a tendency to rise through the tube, while at the same time all the steam formed beneath the Washer is forced to pass out through the tube, and carries along with it the water in the Washer and tube with great power, its place being supplied by the water outside, which is rapidly drawn into the Washer and in turn heated and expelled, thus creating a constant and powerful current upward through the tube and downward through the fabric, giving a water force which cannot be obtained in any other way. The fabric being expanded to its utmost by the boiling water, the dirt softened by the action of the soap, is swept away by the force of the flow. be, while at the same time all the steam formed beneath force of the flow. Thus we have: 1st. The greatest possible heat. 2d. Perfect chemical action of the soap; and 3d. Force of water. All of which are necessary to thoroughly cleanse What is it that cleanses the clothing in the ordi-

drawing between rollers, etc.? It is the filling of the fabric with soap-suds and then forcing it out again, and repeating the process until the clothes are clean. But these processes require hand laber. You must turn or pound, or squeeze or rule; while with the ROBBINS WASHER the labor is dispensed with, and any other work of the house may be done while the washing is doing itself.

THE CAPACITY OF THE WASHER. THE CAPACITY OF THE WASHER.

There are two sizes, the No. 1 or family size, which works in any family builer or wash-pot having a bottom sty by 8 inches or larger, and holding 10 to 12 gallons of water. It will wash bed or table linen, a boiler fall in 10 or 15 minutes, wearing apparel In from 20 to 30 minutes, without rubbing, and repaires no previous preparation of the clothes, such as souking over night. Take the clothes dry, and when the washer area thomotomity at work, fill the boiler, gently pressing them down with a stick. Use only good soap and soft water. If the water is hard it may be softened by a small piece of bornx, which is harmless. For Lace Curtains this Washer is INVALUABLE. It

cleanses them as no other process can, and without t 2, or small hotel size, will do the work in a boiler holding 15 to 25 gallous, and wash, of average pieces, from 500 to 2 000 per day. We also make a Washer 5x8 inches, suitable for use in sunken bottom boilers, of the same capacity as our No. 1

and at same price THEY ARE MADE OF SOLID BRASS, (except the tube,) and can neither rust, corrode, break, or wear out.

QUESTIONS AND ANSWERS. Q. What kind of boiler do you use? A. Any kind of How can you have a flow of water at the rate of ten Q. How can you have a flow of water at the rate of ten gallons per minute in a bofter holding only ten gallons?

A. The same water is used over and over again; and to be thus used, it must pass down through and through the fabric; and this with the scap and heat does the work.

Q. Can you wash flannels and colored clothes? A. We wash anything that can be washed. Flannels and colored clothes need but little scap, and from five to ten minutes of the full operation of the Washer. Flannels and the privated by rivined in het water. It is the charge should be rinsed in het water. It is the change from boiling to cold water that contracts the fibre, causing them to shrink. Fugitive prints will part with their colors by any process, but fast colors will not be

injured.
Q. Can you use common soft soap? A. Yes, if Good.
Q. Is it not better to put very dirty clothes to soak
over night? A. No.
Q. Will your washer remove the streaks from dirty
wristbands and collars? A. The Washer will cleanse
the dirtiest clothing. Give the clothes a thorough rinsing.
Q. How can it be possible for so simple a thing to
cleanse fabrics? A. How is it possible for it nor to
cleanse fabrics? Remember that the entire contents of
the boiler are forced through the expanded clothing the boiler are forced through the expanded clothing every minute, or at least twenty times at every washing and you will see what the result must be.

Q. Will your Washer do everything you claim for it? A. Yes; it will. We guarantee this. SAMPLE WASHER.

On receipt of \$3.50 we will send by Express or Registered mail a Sample No. 1 Washer to any part of the United States, all charges prepaid. Cash must accompany all orders. Remit by Post-Office Order, Registered letter, or by draft on New York. In ordering write plainly your name, post-office, county,

THE STOCK MARKET.

Review of the Week in Wall Street and Closing Prices.

Special Correspondence National Tribune. NEW YORK, Sept. 20.- The stock market has been feverish to-day, and transactions limited. The doubt which still envelops Jay Gould's position in the street is generally regarded as

the principal cause of this unsettled condition of things, and until he shows his hand no press prices. During the past week the greatest activity has been in Northern Pacific, Western Union has led the list in strength and given tone to the railroads. It is said that August Belmont and J. Pierrepont Morgan will enter the Northern Pacific Directory at the coming election. Government bonds continue steady. The following were the closing quota-

tions yesterday: Bid. Asked. U. S. 4½'s, r. 113 113¼ U. S. 4½'s, c. 113 113¼ U. S. 4's, r. 119½ 119½ U. S. 4's, c. 120½ 120½ U. S. cur. 296 13034 — U. S. cur. 297 151 — U. S. cur. 288 15124 — Contin. 5's... 10136

CLOSING QUOTATIONS.

GEORGE E. LEMON,

ATTORNEY-AT-LAW,

P. O. DRAWER 325. WASHINGTON, D. C.

ESTABLISHED 1865.

Pensions.

If wounded, injured, or have contracted any disease, however slight the disability, apply at once. Thousands entitled.

Heirs. Widows, minor children, dependent mothers, fathers, and minor brothers and sisters, in the order named are

War of 1812.

All surviving officers and soldiers of this war, whether

in the Military or Naval service of the United States, who served fourteen (14) days; or, if in a battle or skirmish, for a less period, and the widows of such who have not remarried, are entitled to a pension of eight dollars a nth. Proof of loyalty is no longer required in these Increase of Pensions.

Pension laws are more liberal now than formerly, and many are now entitled to a higher rate than they receive.

From and after January, 1881, I shall make no charges for my services in claims for increase of pension, where no new disability is alleged, unless successful in procur-

Restoration to Pension Roll.

Pensioners who have been unjustly dropped from the pension roll, or whose names have been stricken there-from by reason of failure to draw their pension for a period of three years, or by reason of re-enlistment, may have their pensions renewed by corresponding with this

Desertion from one regiment or vessel and enlistment in another is

not a bar to pension in cases where the wound, disease, or injury was incurred while in the service of the United States and in the line of duty. Land Warrants.

Survivors of all wars from 1790 to March 3, 1855, and ertain heirs, are entitled to one hundred and sixty acres of land, if not already received. Soldiers of the late war not entitled. Land warrants purchased for cash at the highest mar-

Correspondence invited, Prisoners of War. Ration money promptly collected.

ket rate, and assignments perfected.

Collections promptly made.

Furlough Rations. Amounts due collected without unnecessary delay. Such claims cannot be collected without the furlough

Horses Lost in Service. Claims of this character promptly attended to. Many

claims of this character have been erroneously reje Correspondence in such cases is respectfuly invited. Bounty and Pay.

Property taken by the Army in States Not in Insurrection.

Claims of this character will receive special attention, provided they were filed before January 1, 1880. If not filed prior to that date they are barred by statute of lim-In addition to the above we prosecute Military and Naval Claims of every description, procure Patents, Trade-Marks, Copyrights; attend to business before the General Land Office and other Bureaus of the Interior Department, and all the Departments of the Government

We invite correspondence from all interested, assuring them of the utmost promptitude, energy, and thorough-ness in all matters intrusted to our hands. GEORGE E. LEMON.
